

ISO/IEC 27001:2022

Readiness & Gap Analysis Report

Prepared for: Intellfence
Generated on: March 17, 2026

OVERALL READINESS

1%

EARLY STAGE PROGRAM

Executive Summary

This comprehensive readiness report assesses Intellfence's compliance with ISO/IEC 27001:2022, the international standard for Information Security Management Systems (ISMS). With a compliance score of 1%, substantial work remains to achieve ISO 27001 certification. Prioritize high-impact controls and establish foundational security measures.

Control Domain Maturity

Organizational Controls

People Controls

Physical Controls

Technological Controls

Management System Clauses

4. Deficiency Analysis

Detailed review of non-compliant controls requiring remediation and documented implementation steps.

GAP #01 | 5.3 SEGREGATION OF DUTIES

DOMAIN: ORGANIZATIONAL CONTROLS | STATUS: **NOT IMPLEMENTED**

DESCRIPTION

Conflicting duties and areas of responsibility should be segregated to reduce opportunities for unauthorized or unintentional modification or misuse of the organization's assets.

REMEDIATION REQUIREMENTS

Establish formal information security policies and procedures defining the ISMS governing framework. This includes assigning roles, securing management commitment, and documenting organizational scope. Policies must be formally approved and disseminated.

GAP #02 | 5.4 MANAGEMENT RESPONSIBILITIES

DOMAIN: ORGANIZATIONAL CONTROLS | STATUS: **NOT IMPLEMENTED**

DESCRIPTION

Management should require all personnel to apply information security in accordance with the established information security policy, topic-specific policies and procedures of the organization.

REMEDIATION REQUIREMENTS

Establish formal information security policies and procedures defining the ISMS governing framework. This includes assigning roles, securing management commitment, and documenting organizational scope. Policies must be formally approved and disseminated.

GAP #03 | 5.5 CONTACT WITH AUTHORITIES

DOMAIN: ORGANIZATIONAL CONTROLS | STATUS: **NOT IMPLEMENTED**

DESCRIPTION

The organization should establish and maintain contact with appropriate authorities.

REMEDIATION REQUIREMENTS

Establish formal information security policies and procedures defining the ISMS governing framework. This includes assigning roles, securing management commitment, and documenting organizational scope. Policies must be formally approved and disseminated.

GAP #04 | 5.6 CONTACT WITH SPECIAL INTEREST GROUPS

DOMAIN: ORGANIZATIONAL CONTROLS | STATUS: **NOT IMPLEMENTED**

DESCRIPTION

The organization should establish and maintain contact with appropriate special interest groups or other specialist security forums and professional associations.

REMEDIATION REQUIREMENTS

Establish formal information security policies and procedures defining the ISMS governing framework. This includes assigning roles, securing management commitment, and documenting organizational scope. Policies must be formally approved and disseminated.

GAP #05 | 5.7 THREAT INTELLIGENCE

DOMAIN: ORGANIZATIONAL CONTROLS | STATUS: **NOT IMPLEMENTED**

DESCRIPTION

Information relating to information security threats should be collected and analyzed to produce threat intelligence.

REMEDIATION REQUIREMENTS

Establish formal information security policies and procedures defining the ISMS governing framework. This includes assigning roles, securing management commitment, and documenting organizational scope. Policies must be formally approved and disseminated.

GAP #06 | 5.8 INFORMATION SECURITY IN PROJECT MANAGEMENT

DOMAIN: ORGANIZATIONAL CONTROLS | STATUS: **NOT IMPLEMENTED**

DESCRIPTION

Information security should be integrated into project management.

REMEDIATION REQUIREMENTS

Establish formal information security policies and procedures defining the ISMS governing framework. This includes assigning roles, securing management commitment, and documenting organizational scope. Policies must be formally approved and disseminated.

GAP #07 | 5.9 INVENTORY OF INFORMATION AND OTHER ASSOCIATED ASSETS

DOMAIN: ORGANIZATIONAL CONTROLS | STATUS: **NOT IMPLEMENTED**

DESCRIPTION

An inventory of information and other associated assets, including owners, should be developed and maintained.

REMEDIATION REQUIREMENTS

Establish formal information security policies and procedures defining the ISMS governing framework. This includes assigning roles, securing management commitment, and documenting organizational scope. Policies must be formally approved and disseminated.

GAP #08 | 5.10 ACCEPTABLE USE OF INFORMATION AND OTHER ASSOCIATED ASSETS

DOMAIN: ORGANIZATIONAL CONTROLS | STATUS: **NOT IMPLEMENTED**

DESCRIPTION

Rules for the acceptable use and procedures for handling information and other associated assets should be defined, documented and implemented.

REMEDIATION REQUIREMENTS

Establish formal information security policies and procedures defining the ISMS governing framework. This includes assigning roles, securing management commitment, and documenting organizational scope. Policies must be formally approved and disseminated.

GAP #09 | 5.15 ACCESS CONTROL

DOMAIN: ORGANIZATIONAL CONTROLS | STATUS: **NOT IMPLEMENTED**

DESCRIPTION

Rules to control physical and logical access to information and other associated assets should be established and implemented based on business and information security requirements.

REMEDIATION REQUIREMENTS

Establish formal information security policies and procedures defining the ISMS governing framework. This includes assigning roles, securing management commitment, and documenting organizational scope. Policies must be formally approved and disseminated.

GAP #10 | 5.16 IDENTITY MANAGEMENT

DOMAIN: ORGANIZATIONAL CONTROLS | STATUS: **NOT IMPLEMENTED**

DESCRIPTION

The full lifecycle of digital identities should be managed.

REMEDIATION REQUIREMENTS

Establish formal information security policies and procedures defining the ISMS governing framework. This includes assigning roles, securing management commitment, and documenting organizational scope. Policies must be formally approved and disseminated.

GAP #11 | 5.17 AUTHENTICATION INFORMATION

DOMAIN: ORGANIZATIONAL CONTROLS | STATUS: **NOT IMPLEMENTED**

DESCRIPTION

Allocation and management of authentication information should be controlled by a management process, including advising personnel on the appropriate handling of authentication information.

REMEDIATION REQUIREMENTS

Establish formal information security policies and procedures defining the ISMS governing framework. This includes assigning roles, securing management commitment, and documenting organizational scope. Policies must be formally approved and disseminated.

GAP #12 | 5.18 ACCESS RIGHTS

DOMAIN: ORGANIZATIONAL CONTROLS | STATUS: **NOT IMPLEMENTED**

DESCRIPTION

Access rights to information and other associated assets should be provisioned, reviewed, modified and removed in accordance with the organization's topic-specific policy on and rules for access control.

REMEDIATION REQUIREMENTS

Establish formal information security policies and procedures defining the ISMS governing framework. This includes assigning roles, securing management commitment, and documenting organizational scope. Policies must be formally approved and disseminated.

GAP #13 | 6.1 SCREENING

DOMAIN: PEOPLE CONTROLS | STATUS: **NOT IMPLEMENTED**

DESCRIPTION

Background verification checks on all candidates to become personnel should be carried out prior to joining the organization.

REMEDIATION REQUIREMENTS

Implement personnel security lifecycle measures, including pre-employment screening, security awareness training upon onboarding and annually thereafter, and formal contractual security obligations.

GAP #14 | 6.2 TERMS AND CONDITIONS OF EMPLOYMENT

DOMAIN: PEOPLE CONTROLS | STATUS: **NOT IMPLEMENTED**

DESCRIPTION

The contractual agreements with personnel should state their and the organization's responsibilities for information security.

REMEDIATION REQUIREMENTS

Implement personnel security lifecycle measures, including pre-employment screening, security awareness training upon onboarding and annually thereafter, and formal contractual security obligations.

GAP #15 | 6.3 INFORMATION SECURITY AWARENESS, EDUCATION AND TRAINING

DOMAIN: PEOPLE CONTROLS | STATUS: **NOT IMPLEMENTED**

DESCRIPTION

Personnel of the organization and relevant interested parties should receive appropriate information security awareness, education and training.

REMEDIATION REQUIREMENTS

Implement personnel security lifecycle measures, including pre-employment screening, security awareness training upon onboarding and annually thereafter, and formal contractual security obligations.

GAP #16 | 6.4 DISCIPLINARY PROCESS

DOMAIN: PEOPLE CONTROLS | STATUS: **NOT IMPLEMENTED**

DESCRIPTION

A disciplinary process should be formalized and communicated to take action against personnel and other relevant interested parties who have committed an information security policy violation.

REMEDIATION REQUIREMENTS

Implement personnel security lifecycle measures, including pre-employment screening, security awareness training upon onboarding and annually thereafter, and formal contractual security obligations.

GAP #17 | 7.1 PHYSICAL SECURITY PERIMETERS

DOMAIN: PHYSICAL CONTROLS | STATUS: **NOT IMPLEMENTED**

DESCRIPTION

Security perimeters should be defined and used to protect areas that contain information and other associated assets.

REMEDIATION REQUIREMENTS

Specify and deploy physical security perimeters for all restricted areas. Implement modernized access control (biometric/MFA), secure equipment placement, and strict media disposal protocols.

GAP #18 | 7.2 PHYSICAL ENTRY

DOMAIN: PHYSICAL CONTROLS | STATUS: **NOT IMPLEMENTED**

DESCRIPTION

Secure areas should be protected by appropriate entry controls and points of access.

REMEDIATION REQUIREMENTS

Specify and deploy physical security perimeters for all restricted areas. Implement modernized access control (biometric/MFA), secure equipment placement, and strict media disposal protocols.

GAP #19 | 7.3 SECURING OFFICES, ROOMS AND FACILITIES

DOMAIN: PHYSICAL CONTROLS | STATUS: **NOT IMPLEMENTED**

DESCRIPTION

Physical security for offices, rooms and facilities should be designed and implemented.

REMEDIATION REQUIREMENTS

Specify and deploy physical security perimeters for all restricted areas. Implement modernized access control (biometric/MFA), secure equipment placement, and strict media disposal protocols.

GAP #20 | 7.10 STORAGE MEDIA

DOMAIN: PHYSICAL CONTROLS | STATUS: **NOT IMPLEMENTED**

DESCRIPTION

Storage media should be managed through their life cycle of acquisition, use, transportation and disposal in accordance with the organization's topic-specific policy on and rules for storage media.

REMEDIATION REQUIREMENTS

Specify and deploy physical security perimeters for all restricted areas. Implement modernized access control (biometric/MFA), secure equipment placement, and strict media disposal protocols.

GAP #21 | 8.1 USER ENDPOINT DEVICES

DOMAIN: TECHNOLOGICAL CONTROLS | STATUS: **NOT IMPLEMENTED**

DESCRIPTION

Information held on, processed by or accessible via user endpoint devices should be protected.

REMEDIATION REQUIREMENTS

Deploy technical safeguards including least-privilege access, data encryption (at rest/transit), hardened system configurations, continuous security monitoring/logging, and endpoint protection.

GAP #22 | 8.2 PRIVILEGED ACCESS RIGHTS

DOMAIN: TECHNOLOGICAL CONTROLS | STATUS: **NOT IMPLEMENTED**

DESCRIPTION

The allocation and use of privileged access rights should be restricted and managed.

REMEDIATION REQUIREMENTS

Deploy technical safeguards including least-privilege access, data encryption (at rest/transit), hardened system configurations, continuous security monitoring/logging, and endpoint protection.

GAP #23 | 8.3 INFORMATION ACCESS RESTRICTION

DOMAIN: TECHNOLOGICAL CONTROLS | STATUS: **NOT IMPLEMENTED**

DESCRIPTION

Access to information and other associated assets should be restricted in accordance with the established topic-specific policy on access control.

REMEDIATION REQUIREMENTS

Deploy technical safeguards including least-privilege access, data encryption (at rest/transit), hardened system configurations, continuous security monitoring/logging, and endpoint protection.

GAP #24 | 8.4 ACCESS TO SOURCE CODE

DOMAIN: TECHNOLOGICAL CONTROLS | STATUS: **NOT IMPLEMENTED**

DESCRIPTION

Read and write access to source code, development tools and software libraries should be appropriately managed.

REMEDIATION REQUIREMENTS

Deploy technical safeguards including least-privilege access, data encryption (at rest/transit), hardened system configurations, continuous security monitoring/logging, and endpoint protection.

GAP #25 | 8.5 SECURE AUTHENTICATION

DOMAIN: TECHNOLOGICAL CONTROLS | STATUS: **NOT IMPLEMENTED**

DESCRIPTION

Secure authentication technologies and procedures should be implemented based on information access restrictions and the topic-specific policy on access control.

REMEDIATION REQUIREMENTS

Deploy technical safeguards including least-privilege access, data encryption (at rest/transit), hardened system configurations, continuous security monitoring/logging, and endpoint protection.

GAP #26 | 8.8 MANAGEMENT OF TECHNICAL VULNERABILITIES

DOMAIN: TECHNOLOGICAL CONTROLS | STATUS: **NOT IMPLEMENTED**

DESCRIPTION

Information about technical vulnerabilities of information systems in use should be obtained, the organization's exposure to such vulnerabilities should be evaluated and appropriate measures should be taken.

REMEDIATION REQUIREMENTS

Deploy technical safeguards including least-privilege access, data encryption (at rest/transit), hardened system configurations, continuous security monitoring/logging, and endpoint protection.

GAP #27 | 8.9 CONFIGURATION MANAGEMENT

DOMAIN: TECHNOLOGICAL CONTROLS | STATUS: **NOT IMPLEMENTED**

DESCRIPTION

Configurations, including security configurations, of hardware, software, services and networks should be established, documented, implemented, monitored and reviewed.

REMEDIATION REQUIREMENTS

Deploy technical safeguards including least-privilege access, data encryption (at rest/transit), hardened system configurations, continuous security monitoring/logging, and endpoint protection.

GAP #28 | 8.10 INFORMATION DELETION

DOMAIN: TECHNOLOGICAL CONTROLS | STATUS: **NOT IMPLEMENTED**

DESCRIPTION

Information stored in information systems, devices or on any other storage media should be deleted when no longer required.

REMEDIATION REQUIREMENTS

Deploy technical safeguards including least-privilege access, data encryption (at rest/transit), hardened system configurations, continuous security monitoring/logging, and endpoint protection.

GAP #29 | 8.11 DATA MASKING

DOMAIN: TECHNOLOGICAL CONTROLS | STATUS: **NOT IMPLEMENTED**

DESCRIPTION

Data masking should be used in accordance with the organization's topic-specific policy on access control and other related topic-specific policies, and business requirements, taking into consideration applicable legislation.

REMEDIATION REQUIREMENTS

Deploy technical safeguards including least-privilege access, data encryption (at rest/transit), hardened system configurations, continuous security monitoring/logging, and endpoint protection.

GAP #30 | 8.12 DATA LEAKAGE PREVENTION

DOMAIN: TECHNOLOGICAL CONTROLS | STATUS: **NOT IMPLEMENTED**

DESCRIPTION

Data leakage prevention measures should be applied to systems, networks and any other devices that process, store or transmit sensitive information.

REMEDIATION REQUIREMENTS

Deploy technical safeguards including least-privilege access, data encryption (at rest/transit), hardened system configurations, continuous security monitoring/logging, and endpoint protection.

GAP #31 | 8.13 INFORMATION BACKUP

DOMAIN: TECHNOLOGICAL CONTROLS | STATUS: **NOT IMPLEMENTED**

DESCRIPTION

Backup copies of information, software and systems should be maintained and regularly tested in accordance with the agreed topic-specific policy on backup.

REMEDIATION REQUIREMENTS

Deploy technical safeguards including least-privilege access, data encryption (at rest/transit), hardened system configurations, continuous security monitoring/logging, and endpoint protection.

GAP #32 | 8.15 LOGGING

DOMAIN: TECHNOLOGICAL CONTROLS | STATUS: **NOT IMPLEMENTED**

DESCRIPTION

Logs that record activities, exceptions, faults and other relevant events should be produced, kept, protected and reviewed.

REMEDIATION REQUIREMENTS

Deploy technical safeguards including least-privilege access, data encryption (at rest/transit), hardened system configurations, continuous security monitoring/logging, and endpoint protection.

GAP #33 | 8.16 MONITORING ACTIVITIES

DOMAIN: TECHNOLOGICAL CONTROLS | STATUS: **NOT IMPLEMENTED**

DESCRIPTION

Networks, systems and applications should be monitored for anomalous behavior and appropriate actions taken to evaluate potential information security incidents.

REMEDIATION REQUIREMENTS

Deploy technical safeguards including least-privilege access, data encryption (at rest/transit), hardened system configurations, continuous security monitoring/logging, and endpoint protection.

GAP #34 | 8.20 NETWORK SECURITY

DOMAIN: TECHNOLOGICAL CONTROLS | STATUS: **NOT IMPLEMENTED**

DESCRIPTION

Networks and network devices should be secured, managed and controlled to protect information in systems and applications.

REMEDIATION REQUIREMENTS

Deploy technical safeguards including least-privilege access, data encryption (at rest/transit), hardened system configurations, continuous security monitoring/logging, and endpoint protection.

GAP #35 | 8.24 USE OF CRYPTOGRAPHY

DOMAIN: TECHNOLOGICAL CONTROLS | STATUS: **NOT IMPLEMENTED**

DESCRIPTION

Rules for the effective use of cryptography, including cryptographic key management, should be defined and implemented.

REMEDIATION REQUIREMENTS

Deploy technical safeguards including least-privilege access, data encryption (at rest/transit), hardened system configurations, continuous security monitoring/logging, and endpoint protection.

GAP #36 | 8.25 SECURE DEVELOPMENT LIFE CYCLE

DOMAIN: TECHNOLOGICAL CONTROLS | STATUS: **NOT IMPLEMENTED**

DESCRIPTION

Rules for the secure development of software and systems should be established and applied.

REMEDIATION REQUIREMENTS

Deploy technical safeguards including least-privilege access, data encryption (at rest/transit), hardened system configurations, continuous security monitoring/logging, and endpoint protection.

GAP #37 | 8.28 SECURE CODING

DOMAIN: TECHNOLOGICAL CONTROLS | STATUS: **NOT IMPLEMENTED**

DESCRIPTION

Secure coding principles should be applied to software development.

REMEDIATION REQUIREMENTS

Deploy technical safeguards including least-privilege access, data encryption (at rest/transit), hardened system configurations, continuous security monitoring/logging, and endpoint protection.

GAP #38 | 4.1 UNDERSTANDING THE ORGANIZATION AND ITS CONTEXT

DOMAIN: MANAGEMENT SYSTEM CLAUSES | STATUS: **NOT IMPLEMENTED**

DESCRIPTION

The organization shall determine external and internal issues that are relevant to its purpose and that affect its ability to achieve the intended outcome(s) of its information security management system.

REMEDIATION REQUIREMENTS

Review applicability within the ISMS scope. Assign remediation owners, develop supporting documentation, and collect evidence of operational effectiveness for future audits.

GAP #39 | 4.2 UNDERSTANDING THE NEEDS AND EXPECTATIONS OF INTERESTED PARTIES

DOMAIN: MANAGEMENT SYSTEM CLAUSES | STATUS: **NOT IMPLEMENTED**

DESCRIPTION

The organization shall determine interested parties that are relevant to the information security management system and the requirements of these interested parties.

REMEDIATION REQUIREMENTS

Review applicability within the ISMS scope. Assign remediation owners, develop supporting documentation, and collect evidence of operational effectiveness for future audits.

GAP #40 | 4.3 DETERMINING THE SCOPE OF THE ISMS

DOMAIN: MANAGEMENT SYSTEM CLAUSES | STATUS: **NOT IMPLEMENTED**

DESCRIPTION

The organization shall determine the boundaries and applicability of the information security management system to establish its scope.

REMEDIATION REQUIREMENTS

Review applicability within the ISMS scope. Assign remediation owners, develop supporting documentation, and collect evidence of operational effectiveness for future audits.

GAP #41 | 4.4 INFORMATION SECURITY MANAGEMENT SYSTEM

DOMAIN: MANAGEMENT SYSTEM CLAUSES | STATUS: **NOT IMPLEMENTED**

DESCRIPTION

The organization shall establish, implement, maintain and continually improve an information security management system, including the processes needed and their interactions, in accordance with the requirements of this document.

REMEDIATION REQUIREMENTS

Review applicability within the ISMS scope. Assign remediation owners, develop supporting documentation, and collect evidence of operational effectiveness for future audits.

GAP #42 | 5.1_C LEADERSHIP AND COMMITMENT

DOMAIN: MANAGEMENT SYSTEM CLAUSES | STATUS: **NOT IMPLEMENTED**

DESCRIPTION

Top management shall demonstrate leadership and commitment with respect to the information security management system.

REMEDIATION REQUIREMENTS

Review applicability within the ISMS scope. Assign remediation owners, develop supporting documentation, and collect evidence of operational effectiveness for future audits.

GAP #43 | 5.2_C POLICY

DOMAIN: MANAGEMENT SYSTEM CLAUSES | STATUS: **NOT IMPLEMENTED**

DESCRIPTION

Top management shall establish an information security policy.

REMEDIATION REQUIREMENTS

Review applicability within the ISMS scope. Assign remediation owners, develop supporting documentation, and collect evidence of operational effectiveness for future audits.

GAP #44 | 5.3_C ORGANIZATIONAL ROLES, RESPONSIBILITIES AND AUTHORITIES

DOMAIN: MANAGEMENT SYSTEM CLAUSES | STATUS: **NOT IMPLEMENTED**

DESCRIPTION

Top management shall ensure that the responsibilities and authorities for roles relevant to information security are assigned and communicated.

REMEDIATION REQUIREMENTS

Review applicability within the ISMS scope. Assign remediation owners, develop supporting documentation, and collect evidence of operational effectiveness for future audits.

GAP #45 | 6.1.1_C GENERAL - ACTIONS TO ADDRESS RISKS AND OPPORTUNITIES

DOMAIN: MANAGEMENT SYSTEM CLAUSES | STATUS: **NOT IMPLEMENTED**

DESCRIPTION

When planning for the information security management system, the organization shall consider the issues referred to in 4.1 and the requirements referred to in 4.2 and determine the risks and opportunities that need to be addressed.

REMEDIATION REQUIREMENTS

Review applicability within the ISMS scope. Assign remediation owners, develop supporting documentation, and collect evidence of operational effectiveness for future audits.

GAP #46 | 6.1.2_C INFORMATION SECURITY RISK ASSESSMENT

DOMAIN: MANAGEMENT SYSTEM CLAUSES | STATUS: **NOT IMPLEMENTED**

DESCRIPTION

The organization shall define and apply an information security risk assessment process.

REMEDIATION REQUIREMENTS

Review applicability within the ISMS scope. Assign remediation owners, develop supporting documentation, and collect evidence of operational effectiveness for future audits.

GAP #47 | 6.1.3_C INFORMATION SECURITY RISK TREATMENT

DOMAIN: MANAGEMENT SYSTEM CLAUSES | STATUS: **NOT IMPLEMENTED**

DESCRIPTION

The organization shall define and apply an information security risk treatment process.

REMEDIATION REQUIREMENTS

Review applicability within the ISMS scope. Assign remediation owners, develop supporting documentation, and collect evidence of operational effectiveness for future audits.

GAP #48 | 6.2_C INFORMATION SECURITY OBJECTIVES AND PLANNING TO ACHIEVE THEM

DOMAIN: MANAGEMENT SYSTEM CLAUSES | STATUS: **NOT IMPLEMENTED**

DESCRIPTION

The organization shall establish information security objectives at relevant functions and levels.

REMEDIATION REQUIREMENTS

Review applicability within the ISMS scope. Assign remediation owners, develop supporting documentation, and collect evidence of operational effectiveness for future audits.

GAP #49 | 6.3_C PLANNING OF CHANGES

DOMAIN: MANAGEMENT SYSTEM CLAUSES | STATUS: **NOT IMPLEMENTED**

DESCRIPTION

When the organization determines the need for changes to the information security management system, the changes shall be carried out in a planned manner.

REMEDIATION REQUIREMENTS

Review applicability within the ISMS scope. Assign remediation owners, develop supporting documentation, and collect evidence of operational effectiveness for future audits.

GAP #50 | 7.1_C RESOURCES

DOMAIN: MANAGEMENT SYSTEM CLAUSES | STATUS: **NOT IMPLEMENTED**

DESCRIPTION

The organization shall determine and provide the resources needed for the establishment, implementation, maintenance and continual improvement of the information security management system.

REMEDIATION REQUIREMENTS

Review applicability within the ISMS scope. Assign remediation owners, develop supporting documentation, and collect evidence of operational effectiveness for future audits.

GAP #51 | 7.2_C COMPETENCE

DOMAIN: MANAGEMENT SYSTEM CLAUSES | STATUS: **NOT IMPLEMENTED**

DESCRIPTION

The organization shall determine the necessary competence of person(s) doing work under its control that affects its information security performance.

REMEDIATION REQUIREMENTS

Review applicability within the ISMS scope. Assign remediation owners, develop supporting documentation, and collect evidence of operational effectiveness for future audits.

GAP #52 | 7.3_C AWARENESS

DOMAIN: MANAGEMENT SYSTEM CLAUSES | STATUS: **NOT IMPLEMENTED**

DESCRIPTION

Persons doing work under the organization's control shall be aware of the information security policy, their contribution to ISMS effectiveness, and the implications of not conforming to the ISMS requirements.

REMEDIATION REQUIREMENTS

Review applicability within the ISMS scope. Assign remediation owners, develop supporting documentation, and collect evidence of operational effectiveness for future audits.

GAP #53 | 7.4_C COMMUNICATION

DOMAIN: MANAGEMENT SYSTEM CLAUSES | STATUS: **NOT IMPLEMENTED**

DESCRIPTION

The organization shall determine the need for internal and external communications relevant to the information security management system.

REMEDIATION REQUIREMENTS

Review applicability within the ISMS scope. Assign remediation owners, develop supporting documentation, and collect evidence of operational effectiveness for future audits.

GAP #54 | 7.5.1_C GENERAL - DOCUMENTED INFORMATION

DOMAIN: MANAGEMENT SYSTEM CLAUSES | STATUS: **NOT IMPLEMENTED**

DESCRIPTION

The organization's information security management system shall include documented information required by this document and documented information determined by the organization as being necessary for the effectiveness of the ISMS.

REMEDIATION REQUIREMENTS

Review applicability within the ISMS scope. Assign remediation owners, develop supporting documentation, and collect evidence of operational effectiveness for future audits.

GAP #55 | 7.5.2_C CREATING AND UPDATING

DOMAIN: MANAGEMENT SYSTEM CLAUSES | STATUS: **NOT IMPLEMENTED**

DESCRIPTION

When creating and updating documented information, the organization shall ensure appropriate identification, format and review/approval.

REMEDIATION REQUIREMENTS

Review applicability within the ISMS scope. Assign remediation owners, develop supporting documentation, and collect evidence of operational effectiveness for future audits.

GAP #56 | 7.5.3_C CONTROL OF DOCUMENTED INFORMATION

DOMAIN: MANAGEMENT SYSTEM CLAUSES | STATUS: **NOT IMPLEMENTED**

DESCRIPTION

Documented information required by the information security management system and by this document shall be controlled to ensure it is available, suitable for use, and adequately protected.

REMEDIATION REQUIREMENTS

Review applicability within the ISMS scope. Assign remediation owners, develop supporting documentation, and collect evidence of operational effectiveness for future audits.

GAP #57 | 8.1_C OPERATIONAL PLANNING AND CONTROL

DOMAIN: MANAGEMENT SYSTEM CLAUSES | STATUS: **NOT IMPLEMENTED**

DESCRIPTION

The organization shall plan, implement and control the processes needed to meet information security requirements, and to implement the actions determined in Clause 6.

REMEDIATION REQUIREMENTS

Review applicability within the ISMS scope. Assign remediation owners, develop supporting documentation, and collect evidence of operational effectiveness for future audits.

GAP #58 | 8.2_C INFORMATION SECURITY RISK ASSESSMENT

DOMAIN: MANAGEMENT SYSTEM CLAUSES | STATUS: **NOT IMPLEMENTED**

DESCRIPTION

The organization shall perform information security risk assessments at planned intervals or when significant changes are proposed or occur.

REMEDIATION REQUIREMENTS

Review applicability within the ISMS scope. Assign remediation owners, develop supporting documentation, and collect evidence of operational effectiveness for future audits.

GAP #59 | 8.3_C INFORMATION SECURITY RISK TREATMENT

DOMAIN: MANAGEMENT SYSTEM CLAUSES | STATUS: **NOT IMPLEMENTED**

DESCRIPTION

The organization shall implement the information security risk treatment plan.

REMEDIATION REQUIREMENTS

Review applicability within the ISMS scope. Assign remediation owners, develop supporting documentation, and collect evidence of operational effectiveness for future audits.

GAP #60 | 9.1 MONITORING, MEASUREMENT, ANALYSIS AND EVALUATION

DOMAIN: MANAGEMENT SYSTEM CLAUSES | STATUS: **NOT IMPLEMENTED**

DESCRIPTION

The organization shall evaluate the information security performance and the effectiveness of the information security management system.

REMEDIATION REQUIREMENTS

Review applicability within the ISMS scope. Assign remediation owners, develop supporting documentation, and collect evidence of operational effectiveness for future audits.

GAP #61 | 9.2.1 GENERAL - INTERNAL AUDIT

DOMAIN: MANAGEMENT SYSTEM CLAUSES | STATUS: **NOT IMPLEMENTED**

DESCRIPTION

The organization shall conduct internal audits at planned intervals to provide information on whether the ISMS conforms to requirements and is effectively implemented.

REMEDIATION REQUIREMENTS

Review applicability within the ISMS scope. Assign remediation owners, develop supporting documentation, and collect evidence of operational effectiveness for future audits.

GAP #62 | 9.2.2 INTERNAL AUDIT PROGRAMME

DOMAIN: MANAGEMENT SYSTEM CLAUSES | STATUS: **NOT IMPLEMENTED**

DESCRIPTION

The organization shall plan, establish, implement and maintain an audit programme(s).

REMEDIATION REQUIREMENTS

Review applicability within the ISMS scope. Assign remediation owners, develop supporting documentation, and collect evidence of operational effectiveness for future audits.

GAP #63 | 9.3.1 GENERAL - MANAGEMENT REVIEW

DOMAIN: MANAGEMENT SYSTEM CLAUSES | STATUS: **NOT IMPLEMENTED**

DESCRIPTION

Top management shall review the organization's information security management system at planned intervals to ensure its continuing suitability, adequacy and effectiveness.

REMEDIATION REQUIREMENTS

Review applicability within the ISMS scope. Assign remediation owners, develop supporting documentation, and collect evidence of operational effectiveness for future audits.

GAP #64 | 9.3.2 MANAGEMENT REVIEW INPUTS

DOMAIN: MANAGEMENT SYSTEM CLAUSES | STATUS: **NOT IMPLEMENTED**

DESCRIPTION

The management review shall include consideration of various inputs like status of previous actions, changes in issues, and feedback on performance.

REMEDIATION REQUIREMENTS

Review applicability within the ISMS scope. Assign remediation owners, develop supporting documentation, and collect evidence of operational effectiveness for future audits.

GAP #65 | 9.3.3 MANAGEMENT REVIEW RESULTS

DOMAIN: MANAGEMENT SYSTEM CLAUSES | STATUS: **NOT IMPLEMENTED**

DESCRIPTION

The results of the management review shall include decisions related to continual improvement opportunities and any need for changes to the ISMS.

REMEDIATION REQUIREMENTS

Review applicability within the ISMS scope. Assign remediation owners, develop supporting documentation, and collect evidence of operational effectiveness for future audits.

GAP #66 | 10.1 CONTINUAL IMPROVEMENT

DOMAIN: MANAGEMENT SYSTEM CLAUSES | STATUS: **NOT IMPLEMENTED**

DESCRIPTION

The organization shall continually improve the suitability, adequacy and effectiveness of the information security management system.

REMEDIATION REQUIREMENTS

Review applicability within the ISMS scope. Assign remediation owners, develop supporting documentation, and collect evidence of operational effectiveness for future audits.

GAP #67 | 10.2 NONCONFORMITY AND CORRECTIVE ACTION

DOMAIN: MANAGEMENT SYSTEM CLAUSES | STATUS: **NOT IMPLEMENTED**

DESCRIPTION

When a nonconformity occurs, the organization shall react, evaluate the need for action, and implement any action needed.

REMEDIATION REQUIREMENTS

Review applicability within the ISMS scope. Assign remediation owners, develop supporting documentation, and collect evidence of operational effectiveness for future audits.

GAP #68 | 5.11 RETURN OF ASSETS

DOMAIN: ORGANIZATIONAL CONTROLS | STATUS: **NOT IMPLEMENTED**

DESCRIPTION

Personnel and other interested parties as appropriate should return all organization's assets in their possession upon change or termination of their employment, contract or agreement.

REMEDIATION REQUIREMENTS

Establish formal information security policies and procedures defining the ISMS governing framework. This includes assigning roles, securing management commitment, and documenting organizational scope. Policies must be formally approved and disseminated.

GAP #69 | 5.12 CLASSIFICATION OF INFORMATION

DOMAIN: ORGANIZATIONAL CONTROLS | STATUS: **NOT IMPLEMENTED**

DESCRIPTION

Information should be classified according to the information security needs of the organization based on confidentiality, integrity, availability and relevant interested party requirements.

REMEDIATION REQUIREMENTS

Establish formal information security policies and procedures defining the ISMS governing framework. This includes assigning roles, securing management commitment, and documenting organizational scope. Policies must be formally approved and disseminated.

GAP #70 | 5.13 LABELLING OF INFORMATION

DOMAIN: ORGANIZATIONAL CONTROLS | STATUS: **NOT IMPLEMENTED**

DESCRIPTION

An appropriate set of procedures for labelling information should be developed and implemented in accordance with the information classification scheme adopted by the organization.

REMEDIATION REQUIREMENTS

Establish formal information security policies and procedures defining the ISMS governing framework. This includes assigning roles, securing management commitment, and documenting organizational scope. Policies must be formally approved and disseminated.

GAP #71 | 5.14 INFORMATION TRANSFER

DOMAIN: ORGANIZATIONAL CONTROLS | STATUS: **NOT IMPLEMENTED**

DESCRIPTION

Information transfer rules, procedures or agreements should be in place for all types of transfer facilities within the organization and between the organization and other parties.

REMEDIATION REQUIREMENTS

Establish formal information security policies and procedures defining the ISMS governing framework. This includes assigning roles, securing management commitment, and documenting organizational scope. Policies must be formally approved and disseminated.

GAP #72 | 5.19 INFORMATION SECURITY IN SUPPLIER RELATIONSHIPS

DOMAIN: ORGANIZATIONAL CONTROLS | STATUS: **NOT IMPLEMENTED**

DESCRIPTION

Processes and procedures should be defined and implemented to manage the information security risks associated with the use of supplier's products or services.

REMEDIATION REQUIREMENTS

Establish formal information security policies and procedures defining the ISMS governing framework. This includes assigning roles, securing management commitment, and documenting organizational scope. Policies must be formally approved and disseminated.

GAP #73 | 5.20 ADDRESSING INFORMATION SECURITY WITHIN SUPPLIER AGREEMENTS

DOMAIN: ORGANIZATIONAL CONTROLS | STATUS: **NOT IMPLEMENTED**

DESCRIPTION

Relevant information security requirements should be established and agreed with each supplier that may access, process, store, communicate, or provide IT infrastructure components for, the organization's information.

REMEDIATION REQUIREMENTS

Establish formal information security policies and procedures defining the ISMS governing framework. This includes assigning roles, securing management commitment, and documenting organizational scope. Policies must be formally approved and disseminated.

GAP #74 | 5.21 MANAGING INFORMATION SECURITY IN THE ICT SUPPLY CHAIN

DOMAIN: ORGANIZATIONAL CONTROLS | STATUS: **NOT IMPLEMENTED**

DESCRIPTION

Processes and procedures should be defined and implemented to manage the information security risks associated with the ICT products and services supply chain.

REMEDIATION REQUIREMENTS

Establish formal information security policies and procedures defining the ISMS governing framework. This includes assigning roles, securing management commitment, and documenting organizational scope. Policies must be formally approved and disseminated.

GAP #75 | 5.22 MONITORING, REVIEW AND CHANGE MANAGEMENT OF SUPPLIER SERVICES

DOMAIN: ORGANIZATIONAL CONTROLS | STATUS: **NOT IMPLEMENTED**

DESCRIPTION

The organization should regularly monitor, review and audit supplier service delivery and security performance against the information security requirements in supplier agreements.

REMEDIATION REQUIREMENTS

Establish formal information security policies and procedures defining the ISMS governing framework. This includes assigning roles, securing management commitment, and documenting organizational scope. Policies must be formally approved and disseminated.

GAP #76 | 5.23 INFORMATION SECURITY FOR THE USE OF CLOUD SERVICES

DOMAIN: ORGANIZATIONAL CONTROLS | STATUS: **NOT IMPLEMENTED**

DESCRIPTION

Processes for acquisition, use, management and exit from cloud services should be established in accordance with the organization's information security requirements.

REMEDIATION REQUIREMENTS

Establish formal information security policies and procedures defining the ISMS governing framework. This includes assigning roles, securing management commitment, and documenting organizational scope. Policies must be formally approved and disseminated.

GAP #77 | 5.24 INFORMATION SECURITY INCIDENT MANAGEMENT PLANNING AND PREPARATION

DOMAIN: ORGANIZATIONAL CONTROLS | STATUS: **NOT IMPLEMENTED**

DESCRIPTION

The organization should plan and prepare for information security incident management by defining, establishing and communicating information security incident management processes, roles and responsibilities.

REMEDIATION REQUIREMENTS

Establish formal information security policies and procedures defining the ISMS governing framework. This includes assigning roles, securing management commitment, and documenting organizational scope. Policies must be formally approved and disseminated.

GAP #78 | 5.25 MANAGEMENT OF INFORMATION SECURITY INCIDENTS

DOMAIN: ORGANIZATIONAL CONTROLS | STATUS: **NOT IMPLEMENTED**

DESCRIPTION

Information security incidents should be managed by following the established processes.

REMEDIATION REQUIREMENTS

Establish formal information security policies and procedures defining the ISMS governing framework. This includes assigning roles, securing management commitment, and documenting organizational scope. Policies must be formally approved and disseminated.

GAP #79 | 5.26 LEARNING FROM INFORMATION SECURITY INCIDENTS

DOMAIN: ORGANIZATIONAL CONTROLS | STATUS: **NOT IMPLEMENTED**

DESCRIPTION

Knowledge gained from information security incidents should be used to strengthen and improve the information security controls.

REMEDIATION REQUIREMENTS

Establish formal information security policies and procedures defining the ISMS governing framework. This includes assigning roles, securing management commitment, and documenting organizational scope. Policies must be formally approved and disseminated.

GAP #80 | 5.27 COLLECTION OF EVIDENCE

DOMAIN: ORGANIZATIONAL CONTROLS | STATUS: **NOT IMPLEMENTED**

DESCRIPTION

The organization should establish and implement procedures for the identification, collection, acquisition and preservation of evidence related to information security events.

REMEDIATION REQUIREMENTS

Establish formal information security policies and procedures defining the ISMS governing framework. This includes assigning roles, securing management commitment, and documenting organizational scope. Policies must be formally approved and disseminated.

GAP #81 | 5.28 INFORMATION SECURITY DURING DISRUPTION

DOMAIN: ORGANIZATIONAL CONTROLS | STATUS: **NOT IMPLEMENTED**

DESCRIPTION

The organization should plan how to maintain information security at an appropriate level during disruption.

REMEDIATION REQUIREMENTS

Establish formal information security policies and procedures defining the ISMS governing framework. This includes assigning roles, securing management commitment, and documenting organizational scope. Policies must be formally approved and disseminated.

GAP #82 | 5.29 INFORMATION SECURITY EVENT REPORTING

DOMAIN: ORGANIZATIONAL CONTROLS | STATUS: **NOT IMPLEMENTED**

DESCRIPTION

Information security events should be reported through the identified reporting channels as quickly as possible.

REMEDIATION REQUIREMENTS

Establish formal information security policies and procedures defining the ISMS governing framework. This includes assigning roles, securing management commitment, and documenting organizational scope. Policies must be formally approved and disseminated.

GAP #83 | 5.30 ICT READINESS FOR BUSINESS CONTINUITY

DOMAIN: ORGANIZATIONAL CONTROLS | STATUS: **NOT IMPLEMENTED**

DESCRIPTION

ICT readiness should be planned, implemented, maintained and tested based on business continuity objectives and ICT continuity requirements.

REMEDIATION REQUIREMENTS

Establish formal information security policies and procedures defining the ISMS governing framework. This includes assigning roles, securing management commitment, and documenting organizational scope. Policies must be formally approved and disseminated.

GAP #84 | 5.31 LEGAL, STATUTORY, REGULATORY AND CONTRACTUAL REQUIREMENTS

DOMAIN: ORGANIZATIONAL CONTROLS | STATUS: **NOT IMPLEMENTED**

DESCRIPTION

Legal, statutory, regulatory and contractual requirements relevant to information security and the organization's approach to satisfy these requirements should be identified, documented and kept up to date.

REMEDIATION REQUIREMENTS

Establish formal information security policies and procedures defining the ISMS governing framework. This includes assigning roles, securing management commitment, and documenting organizational scope. Policies must be formally approved and disseminated.

GAP #85 | 5.32 INTELLECTUAL PROPERTY RIGHTS

DOMAIN: ORGANIZATIONAL CONTROLS | STATUS: **NOT IMPLEMENTED**

DESCRIPTION

The organization should implement appropriate procedures to protect intellectual property rights.

REMEDIATION REQUIREMENTS

Establish formal information security policies and procedures defining the ISMS governing framework. This includes assigning roles, securing management commitment, and documenting organizational scope. Policies must be formally approved and disseminated.

GAP #86 | 5.33 PROTECTION OF RECORDS

DOMAIN: ORGANIZATIONAL CONTROLS | STATUS: **NOT IMPLEMENTED**

DESCRIPTION

Records should be protected from loss, destruction, falsification, unauthorized access and unauthorized release, in accordance with legal, statutory, regulatory, contractual and business requirements.

REMEDIATION REQUIREMENTS

Establish formal information security policies and procedures defining the ISMS governing framework. This includes assigning roles, securing management commitment, and documenting organizational scope. Policies must be formally approved and disseminated.

GAP #87 | 5.34 PRIVACY AND PROTECTION OF PII

DOMAIN: ORGANIZATIONAL CONTROLS | STATUS: **NOT IMPLEMENTED**

DESCRIPTION

The organization should identify and meet the requirements regarding the preservation of privacy and protection of PII according to applicable laws and regulations and contractual requirements.

REMEDIATION REQUIREMENTS

Establish formal information security policies and procedures defining the ISMS governing framework. This includes assigning roles, securing management commitment, and documenting organizational scope. Policies must be formally approved and disseminated.

GAP #88 | 5.35 INDEPENDENT REVIEW OF INFORMATION SECURITY

DOMAIN: ORGANIZATIONAL CONTROLS | STATUS: **NOT IMPLEMENTED**

DESCRIPTION

The organization's approach to managing information security and its implementation including people, processes and technologies should be reviewed independently at planned intervals, or when significant changes occur.

REMEDIATION REQUIREMENTS

Establish formal information security policies and procedures defining the ISMS governing framework. This includes assigning roles, securing management commitment, and documenting organizational scope. Policies must be formally approved and disseminated.

GAP #89 | 5.36 COMPLIANCE WITH POLICIES AND STANDARDS FOR INFORMATION SECURITY

DOMAIN: ORGANIZATIONAL CONTROLS | STATUS: **NOT IMPLEMENTED**

DESCRIPTION

Compliance with the organization's information security policy, topic-specific policies, rules and standards should be regularly reviewed.

REMEDIATION REQUIREMENTS

Establish formal information security policies and procedures defining the ISMS governing framework. This includes assigning roles, securing management commitment, and documenting organizational scope. Policies must be formally approved and disseminated.

GAP #90 | 5.37 DOCUMENTED OPERATING PROCEDURES

DOMAIN: ORGANIZATIONAL CONTROLS | STATUS: **NOT IMPLEMENTED**

DESCRIPTION

Operating procedures for information processing facilities should be documented and made available to personnel who need them.

REMEDIATION REQUIREMENTS

Establish formal information security policies and procedures defining the ISMS governing framework. This includes assigning roles, securing management commitment, and documenting organizational scope. Policies must be formally approved and disseminated.

GAP #91 | 6.5 RESPONSIBILITIES AFTER TERMINATION OR CHANGE OF EMPLOYMENT

DOMAIN: PEOPLE CONTROLS | STATUS: **NOT IMPLEMENTED**

DESCRIPTION

Information security responsibilities and duties that remain valid after termination or change of employment should be defined, enforced and communicated to relevant personnel and other interested parties.

REMEDIATION REQUIREMENTS

Implement personnel security lifecycle measures, including pre-employment screening, security awareness training upon onboarding and annually thereafter, and formal contractual security obligations.

GAP #92 | 6.6 CONFIDENTIALITY OR NON-DISCLOSURE AGREEMENTS

DOMAIN: PEOPLE CONTROLS | STATUS: **NOT IMPLEMENTED**

DESCRIPTION

Confidentiality or non-disclosure agreements reflecting the organization's needs for the protection of information should be identified, documented, regularly reviewed and signed by personnel and other relevant interested parties.

REMEDIATION REQUIREMENTS

Implement personnel security lifecycle measures, including pre-employment screening, security awareness training upon onboarding and annually thereafter, and formal contractual security obligations.

GAP #93 | 6.7 REMOTE WORKING

DOMAIN: PEOPLE CONTROLS | STATUS: **NOT IMPLEMENTED**

DESCRIPTION

Security measures should be implemented when personnel are working remotely to protect information accessed, processed or stored outside the organization's premises.

REMEDIATION REQUIREMENTS

Implement personnel security lifecycle measures, including pre-employment screening, security awareness training upon onboarding and annually thereafter, and formal contractual security obligations.

GAP #94 | 6.8 INFORMATION SECURITY EVENT REPORTING

DOMAIN: PEOPLE CONTROLS | STATUS: **NOT IMPLEMENTED**

DESCRIPTION

Personnel should report information security events through the identified reporting channels as quickly as possible.

REMEDIATION REQUIREMENTS

Implement personnel security lifecycle measures, including pre-employment screening, security awareness training upon onboarding and annually thereafter, and formal contractual security obligations.

GAP #95 | 7.4 PHYSICAL SECURITY MONITORING

DOMAIN: PHYSICAL CONTROLS | STATUS: **NOT IMPLEMENTED**

DESCRIPTION

Premises should be continuously monitored for unauthorized physical access.

REMEDIATION REQUIREMENTS

Specify and deploy physical security perimeters for all restricted areas. Implement modernized access control (biometric/MFA), secure equipment placement, and strict media disposal protocols.

GAP #96 | 7.5 PROTECTING AGAINST PHYSICAL AND ENVIRONMENTAL THREATS

DOMAIN: PHYSICAL CONTROLS | STATUS: **NOT IMPLEMENTED**

DESCRIPTION

Protection against physical and environmental threats, such as natural disasters and other intentional or unintentional physical threats to infrastructure, should be designed and implemented.

REMEDIATION REQUIREMENTS

Specify and deploy physical security perimeters for all restricted areas. Implement modernized access control (biometric/MFA), secure equipment placement, and strict media disposal protocols.

GAP #97 | 7.6 WORKING IN SECURE AREAS

DOMAIN: PHYSICAL CONTROLS | STATUS: **NOT IMPLEMENTED**

DESCRIPTION

Security measures for working in secure areas should be designed and implemented.

REMEDIATION REQUIREMENTS

Specify and deploy physical security perimeters for all restricted areas. Implement modernized access control (biometric/MFA), secure equipment placement, and strict media disposal protocols.

GAP #98 | 7.7 CLEAR DESK AND CLEAR SCREEN

DOMAIN: PHYSICAL CONTROLS | STATUS: **NOT IMPLEMENTED**

DESCRIPTION

Clear desk rules for papers and removable storage media and clear screen rules for information processing facilities should be defined and appropriately enforced.

REMEDIATION REQUIREMENTS

Specify and deploy physical security perimeters for all restricted areas. Implement modernized access control (biometric/MFA), secure equipment placement, and strict media disposal protocols.

GAP #99 | 7.8 EQUIPMENT SITING AND PROTECTION

DOMAIN: PHYSICAL CONTROLS | STATUS: **NOT IMPLEMENTED**

DESCRIPTION

Equipment should be sited securely and protected.

REMEDIATION REQUIREMENTS

Specify and deploy physical security perimeters for all restricted areas. Implement modernized access control (biometric/MFA), secure equipment placement, and strict media disposal protocols.

GAP #100 | 7.9 SECURITY OF ASSETS OFF-PREMISES

DOMAIN: PHYSICAL CONTROLS | STATUS: **NOT IMPLEMENTED**

DESCRIPTION

Off-site assets should be protected.

REMEDIATION REQUIREMENTS

Specify and deploy physical security perimeters for all restricted areas. Implement modernized access control (biometric/MFA), secure equipment placement, and strict media disposal protocols.

GAP #101 | 7.11 SUPPORTING UTILITIES

DOMAIN: PHYSICAL CONTROLS | STATUS: **NOT IMPLEMENTED**

DESCRIPTION

Information processing facilities should be protected from power failures and other disruptions caused by failures in supporting utilities.

REMEDIATION REQUIREMENTS

Specify and deploy physical security perimeters for all restricted areas. Implement modernized access control (biometric/MFA), secure equipment placement, and strict media disposal protocols.

GAP #102 | 7.12 CABLING SECURITY

DOMAIN: PHYSICAL CONTROLS | STATUS: **NOT IMPLEMENTED**

DESCRIPTION

Cabling carrying power, data or supporting information services should be protected from interception, interference or damage.

REMEDIATION REQUIREMENTS

Specify and deploy physical security perimeters for all restricted areas. Implement modernized access control (biometric/MFA), secure equipment placement, and strict media disposal protocols.

GAP #103 | 7.13 EQUIPMENT MAINTENANCE

DOMAIN: PHYSICAL CONTROLS | STATUS: **NOT IMPLEMENTED**

DESCRIPTION

Equipment should be correctly maintained to ensure its continued availability and integrity.

REMEDIATION REQUIREMENTS

Specify and deploy physical security perimeters for all restricted areas. Implement modernized access control (biometric/MFA), secure equipment placement, and strict media disposal protocols.

GAP #104 | 7.14 SECURE DISPOSAL OR RE-USE OF EQUIPMENT

DOMAIN: PHYSICAL CONTROLS | STATUS: **NOT IMPLEMENTED**

DESCRIPTION

Items of equipment containing storage media should be verified to ensure that any sensitive data and licensed software has been removed or securely overwritten prior to disposal or re-use.

REMEDIATION REQUIREMENTS

Specify and deploy physical security perimeters for all restricted areas. Implement modernized access control (biometric/MFA), secure equipment placement, and strict media disposal protocols.

GAP #105 | 8.6 CAPACITY MANAGEMENT

DOMAIN: TECHNOLOGICAL CONTROLS | STATUS: **NOT IMPLEMENTED**

DESCRIPTION

The use of resources should be monitored and adjusted in line with current and expected capacity requirements.

REMEDIATION REQUIREMENTS

Deploy technical safeguards including least-privilege access, data encryption (at rest/transit), hardened system configurations, continuous security monitoring/logging, and endpoint protection.

GAP #106 | 8.7 PROTECTION AGAINST MALWARE

DOMAIN: TECHNOLOGICAL CONTROLS | STATUS: **NOT IMPLEMENTED**

DESCRIPTION

Protection against malware should be implemented and supported by appropriate user awareness.

REMEDIATION REQUIREMENTS

Deploy technical safeguards including least-privilege access, data encryption (at rest/transit), hardened system configurations, continuous security monitoring/logging, and endpoint protection.

GAP #107 | 8.14 REDUNDANCY OF INFORMATION PROCESSING FACILITIES

DOMAIN: TECHNOLOGICAL CONTROLS | STATUS: **NOT IMPLEMENTED**

DESCRIPTION

Information processing facilities should be implemented with redundancy sufficient to meet availability requirements.

REMEDIATION REQUIREMENTS

Deploy technical safeguards including least-privilege access, data encryption (at rest/transit), hardened system configurations, continuous security monitoring/logging, and endpoint protection.

GAP #108 | 8.17 CLOCK SYNCHRONIZATION

DOMAIN: TECHNOLOGICAL CONTROLS | STATUS: **NOT IMPLEMENTED**

DESCRIPTION

The clocks of all relevant information processing systems within the organization should be synchronized to a single reference time source.

REMEDIATION REQUIREMENTS

Deploy technical safeguards including least-privilege access, data encryption (at rest/transit), hardened system configurations, continuous security monitoring/logging, and endpoint protection.

GAP #109 | 8.18 USE OF PRIVILEGED UTILITY PROGRAMS

DOMAIN: TECHNOLOGICAL CONTROLS | STATUS: **NOT IMPLEMENTED**

DESCRIPTION

The use of utility programs that can be capable of overriding system and application controls should be restricted and tightly controlled.

REMEDIATION REQUIREMENTS

Deploy technical safeguards including least-privilege access, data encryption (at rest/transit), hardened system configurations, continuous security monitoring/logging, and endpoint protection.

GAP #110 | 8.19 INSTALLATION OF SOFTWARE ON OPERATIONAL SYSTEMS

DOMAIN: TECHNOLOGICAL CONTROLS | STATUS: **NOT IMPLEMENTED**

DESCRIPTION

Procedures and measures should be implemented to securely manage software installation on operational systems.

REMEDIATION REQUIREMENTS

Deploy technical safeguards including least-privilege access, data encryption (at rest/transit), hardened system configurations, continuous security monitoring/logging, and endpoint protection.

GAP #111 | 8.21 SECURITY OF NETWORK SERVICES

DOMAIN: TECHNOLOGICAL CONTROLS | STATUS: **NOT IMPLEMENTED**

DESCRIPTION

Security mechanisms, service levels and service requirements of network services should be identified, implemented and monitored.

REMEDIATION REQUIREMENTS

Deploy technical safeguards including least-privilege access, data encryption (at rest/transit), hardened system configurations, continuous security monitoring/logging, and endpoint protection.

GAP #112 | 8.22 WEB FILTERING

DOMAIN: TECHNOLOGICAL CONTROLS | STATUS: **NOT IMPLEMENTED**

DESCRIPTION

Access to external websites should be managed to reduce exposure to malicious content.

REMEDIATION REQUIREMENTS

Deploy technical safeguards including least-privilege access, data encryption (at rest/transit), hardened system configurations, continuous security monitoring/logging, and endpoint protection.

GAP #113 | 8.23 SEGREGATION IN NETWORKS

DOMAIN: TECHNOLOGICAL CONTROLS | STATUS: **NOT IMPLEMENTED**

DESCRIPTION

Groups of information services, users and information systems should be segregated in the organization's networks.

REMEDIATION REQUIREMENTS

Deploy technical safeguards including least-privilege access, data encryption (at rest/transit), hardened system configurations, continuous security monitoring/logging, and endpoint protection.

GAP #114 | 8.26 APPLICATION SECURITY REQUIREMENTS

DOMAIN: TECHNOLOGICAL CONTROLS | STATUS: **NOT IMPLEMENTED**

DESCRIPTION

Information security requirements should be identified, specified and approved when developing or acquiring applications.

REMEDIATION REQUIREMENTS

Deploy technical safeguards including least-privilege access, data encryption (at rest/transit), hardened system configurations, continuous security monitoring/logging, and endpoint protection.

GAP #115 | 8.27 SECURE SYSTEM ARCHITECTURE AND ENGINEERING PRINCIPLES

DOMAIN: TECHNOLOGICAL CONTROLS | STATUS: **NOT IMPLEMENTED**

DESCRIPTION

Principles for engineering secure systems should be established, documented, maintained and applied to any information system-building activities.

REMEDIATION REQUIREMENTS

Deploy technical safeguards including least-privilege access, data encryption (at rest/transit), hardened system configurations, continuous security monitoring/logging, and endpoint protection.

GAP #116 | 8.29 SECURITY TESTING IN DEVELOPMENT AND ACCEPTANCE

DOMAIN: TECHNOLOGICAL CONTROLS | STATUS: **NOT IMPLEMENTED**

DESCRIPTION

Security testing processes should be defined and implemented in the development life cycle.

REMEDIATION REQUIREMENTS

Deploy technical safeguards including least-privilege access, data encryption (at rest/transit), hardened system configurations, continuous security monitoring/logging, and endpoint protection.

GAP #117 | 8.30 OUTSOURCED DEVELOPMENT

DOMAIN: TECHNOLOGICAL CONTROLS | STATUS: **NOT IMPLEMENTED**

DESCRIPTION

The organization should direct, monitor and review the activities related to outsourced system development.

REMEDIATION REQUIREMENTS

Deploy technical safeguards including least-privilege access, data encryption (at rest/transit), hardened system configurations, continuous security monitoring/logging, and endpoint protection.

GAP #118 | 8.31 SEPARATION OF DEVELOPMENT, TEST AND PRODUCTION ENVIRONMENTS

DOMAIN: TECHNOLOGICAL CONTROLS | STATUS: **NOT IMPLEMENTED**

DESCRIPTION

Development, testing and production environments should be separated and secured.

REMEDIATION REQUIREMENTS

Deploy technical safeguards including least-privilege access, data encryption (at rest/transit), hardened system configurations, continuous security monitoring/logging, and endpoint protection.

GAP #119 | 8.32 CHANGE MANAGEMENT

DOMAIN: TECHNOLOGICAL CONTROLS | STATUS: **NOT IMPLEMENTED**

DESCRIPTION

Changes to information processing facilities and information systems should be subject to change management procedures.

REMEDIATION REQUIREMENTS

Deploy technical safeguards including least-privilege access, data encryption (at rest/transit), hardened system configurations, continuous security monitoring/logging, and endpoint protection.

GAP #120 | 8.33 TEST INFORMATION

DOMAIN: TECHNOLOGICAL CONTROLS | STATUS: **NOT IMPLEMENTED**

DESCRIPTION

Test information should be appropriately selected, protected and controlled.

REMEDIATION REQUIREMENTS

Deploy technical safeguards including least-privilege access, data encryption (at rest/transit), hardened system configurations, continuous security monitoring/logging, and endpoint protection.

GAP #121 | 8.34 PROTECTION OF INFORMATION SYSTEMS DURING AUDIT TESTS

DOMAIN: TECHNOLOGICAL CONTROLS | STATUS: **NOT IMPLEMENTED**

DESCRIPTION

Audit tests and other assurance activities involving assessment of operational systems should be planned and agreed between the tester and appropriate management.

REMEDIATION REQUIREMENTS

Deploy technical safeguards including least-privilege access, data encryption (at rest/transit), hardened system configurations, continuous security monitoring/logging, and endpoint protection.

Strategic Recommendations

FOUNDATIONAL DEVELOPMENT

1. Establish ISMS governance board
 2. Define organizational scope and boundaries
 3. Approve core security policy suite
 4. Identify and classify critical assets
-

Prioritized Domain Remediation

- **Organizational Controls: 35 Priority Gap(s) Identified**
- **People Controls: 8 Priority Gap(s) Identified**
- **Physical Controls: 14 Priority Gap(s) Identified**
- **Technological Controls: 34 Priority Gap(s) Identified**
- **Management System Clauses: 30 Priority Gap(s) Identified**

ACTIONS & NEXT STEPS

1. Present this report to the Information Security Steering Committee.
 2. Assign remediation owners to the deficiencies identified in Section 4.
 3. Update the Risk Treatment Plan based on these findings.
-
